

## Professional Growth

We deeply believe in the professional growth of our team:

**Business Analyst.** Business Analysts are able to process information and data, creating reports and other forms of communication using PowerPoint and Excel.

1-2 years

**Consultant.** Consultants monitor projects on a day-to-day basis and can successfully complete them using their in-depth knowledge of the matter at hand. Consultants act as an interface, a sort of go-between with the client and can readily anticipate their demands.

2-5 years

**Manager.** Managers have daily face-to-face contact with clients, their goal is to build with them a strong and lasting relation, based on trust, mutual respect, shared expectations, success and business plans.

5+ years

**Partner.** A key company figure with excellent abilities and the capacity to propose profitable, lasting, effective changes to clients. Partners are the main point of reference for all other colleagues and project members.
